

490-watt outdoor power supply

How many Watts Does a portable power station have?

We recorded an impressive 92 percent of its listed 2,073.6-watt-hour capacity, well over the 85 percent average for most portable power stations. It also boasted a quick recharge time for its capacity, going from 0 to 80 percent in 81 minutes and to full in just 107 minutes.

How much power does a Jackery 300 watt power station use?

That balance of power and light weight makes Jackery's newest 300-series power station an ideal option for camping trips or off-grid remote working. It pumps out just over 300 watts (we recorded a max sustained wattage of 310 watts), but weighs just over 8 pounds and is about the size of a lunchbox.

How do I choose a portable power station?

A portable power station's maximum output tells you the total watts it can produce, which determines what you can and can't power with it. Look for a power station that can handle the combined wattage of the electronics you plan to plug into it.
