

800-5 Solar Mounting

What is a solar mounting system directory?

A global solar mounting system directory with advanced filters that lets you review and compare mounting systems. Pictures, data sheets, PDFs and certifications are shown.

How do I find the right PV mounting system?

Solar installers, system integrators, and sellers can use our advanced technical filters to find the exact PV mounting systems that match their needs. We have collated mounting system data from manufacturers from all around the world into a common template, allowing you to compare and review mounting systems easily.

What are antaisolar roof mounting systems?

Antaisolar's roof mounting systems provide secure, lightweight solutions for all roof types- including metal, tile, concrete, TPO, BIPV, and balconies. Featuring our patented SnapFit Click-in System, they enable one-handed installation without compromising stability.

How to install a solar panel on a commercial roof?

The solution has been widely used in commercial and residential roofs in recent years, owing to its good reputation and feedback from clients. Just install the L-shaped feet on the roof sheet, then fix the rail and solar panel. Engineered for open-field projects with superior structural strength.
