

Are photovoltaic panels worth the money

Are solar panels worth the investment?

For more and more homeowners going solar, batteries are becoming essential, rather than a nice-to-have, for peace of mind and maximum savings. While solar works for most homeowners, certain situations make it less attractive or financially unviable. Here's when solar panels typically aren't worth the investment:

How much will solar panels cost?

Without solar panels, the average EnergySage shopper will pay about \$87,000 in electricity bills over the next 25 years, according to EnergySage data. If you install solar panels now at an average cost of \$29,649 before any incentives, you'll save about \$57,000 over the next two and a half decades.

Do solar panels add value to your home?

According to the US Department of Energy's Lawrence Berkeley National Laboratory, solar panels can add serious value to your home and sell quicker than homes without solar. A recent study found that, based on the average home cost, homes with solar sell for 6.8% more, adding a value of around \$25,000. Solar panels can add to your home's value.
