

Atess hybrid inverter factory in Congo

Expert in solar energy storage, ATESS offers energy storage solutions & EV charger solutions and delivers clean power to more than 85 countries, with 13 offices and warehouses worldwide.

Factory: For factories with higher energy consumption, the 50kw hybrid inverter and 40kw hybrid inverter can significantly lower operational costs and ensure production continuity during grid outages.

A hybrid inverter is a device that combines the functions of a solar inverter (converting DC power from solar panels to AC power) and a battery inverter (managing the charging/discharging of a battery ...

We are proud to share a recent installation in Kinshasa, DR Congo, where an ATESS hybrid storage system is now safeguarding a local bank branch's daily operations.

#ATESS is thrilled to announce the successful completion of a solar power plant installation for the Congo National Public Health Laboratory in Brazzaville!...

All-in-one hybrid inverter combines solar and battery into one unit, with powers from 5kW to 150kW, allowing users to harness solar power, store excess energy, and use it during peak demand or outages.

#ATESS is thrilled to announce the successful completion of a solar power plant installation, commissioned to Africa Solaire, for the Congo National Public Health Laboratory in Brazzaville! ?...

100/150kW high voltage all-in-one hybrid inverter for commercial application, supporting up to 600kW system capacity. Industrial and commercial scenarios: Reduce peak demand charges and ensure ...
