

# Austria purchases stone for solar panels

Is Austria poised for a significant transformation in solar energy?

Austria's solar energy sector is poised for a significant transformation as the government updates its subsidy guidelines to incentivize more power purchase agreements (PPAs) for solar photovoltaic (PV) projects.

Does Austria have a solar incentive program?

She has been reporting on solar since 2008. The Austrian government has introduced incentives for PV systems over 35 kW that feature made-in-Europe modules. The measure aims to create new jobs and support the energy transition, offering a 20% higher subsidy for qualifying projects.

Why is Austria allowing PV systems with PPAs to receive subsidies?

By enabling PV systems with PPAs to receive additional subsidies, the Austrian government is facilitating easier access to financing for developers of new projects. The revised guidelines are part of Austria's broader strategy to transition to a low-carbon economy and achieve its renewable energy targets.

What are Austria's new incentives for made-in-Europe PV systems?
