

Belarusian power station power generation

The Belarusian nuclear power plant uses the Russian design AES-2006 featuring two VVER-1200 reactors with the total output capacity of 2,400MW. It is an evolutionary nuclear power plant design with third-generation ...

In 2023 Belarus had 12.7 GW of electricity installed generating capacity. As of 2021, Belarus registered more than 49 small-scale hydro-power plants up to 10 MW with a total installed capacity of 17.3 MW.

Since the first power unit was connected to the power grid, BelNPP has generated more than 41 billion kWh of electricity, which made it possible to replace about 11 billion cubic meters of natural gas," ...

In a strategic move to reduce its heavy dependence on Russian natural gas, Belarus has successfully completed its first nuclear power plant (NPP).

Renewable energy generation accounted for 6% of Belarus's energy in 2018, rising to 8% in 2020, mostly from biofuels and waste. Renewables share in electricity generation was 2% in 2018 (0.8 TWh).

Belarusian nuclear power plant (NPP) is built near the town of Ostrovets, in the Grodno region. The result of the development of the Belarusian nuclear power programme has been the commissioning of Unit 1 of the ...

The power plant is built close to the Belarus- Lithuania border, being 40 kilometres (25 mi) east of the Lithuanian capital of Vilnius. The plant is powered by two 1194-MW VVER-1200 units supplied by Atomstroyexport, the ...

By implementing the existing agreements, Belarus acts as a reliable partner in energy transit and an active participant in efforts to reduce air pollutant emissions. The country has achieved high results in efficient use ...

The Belarusian nuclear power plant has generated 40 billion kWh of electricity since the first unit was connected to the grid, the press service of the Energy Ministry told BelTA.
