

Can I take a photo of the barcode on the supermarket locker

How to scan a barcode?

The long answer is that you have to scan the barcode from your smartphone or a barcode scanning app, and the photo of the barcode needs to be relatively high quality. The good news is that this feature is convenient and nearly ubiquitous, simplifying tasks like product research and information retrieval.

Why can't I take a picture of a barcode or QR code?

You are not taking a picture of the barcode or QR code. If the camera recognizes the code, it shows a link that can be tapped without tapping the button to take a picture. If the camera app is not detecting any code, try different angles and move the phone or tablet closer to the code.

Can you scan a barcode from a smartphone?

The short answer is 'Yes', you absolutely can. The long answer is that you have to scan the barcode from your smartphone or a barcode scanning app, and the photo of the barcode needs to be relatively high quality.

Should you scan a barcode from a photo?

Scanning barcodes from photos can be incredibly handy when you want to quickly access information without physically scanning the barcode itself. Whether you're comparing prices while shopping or accessing event details from a poster, this feature makes barcode scanning more versatile and user-friendly.
