

In a significant stride towards energy modernisation, Croatia is setting aside EUR 500 million for the development of large-scale energy storage systems.

The project, valued at 60 million, marks the first step toward creating a virtual network of battery storage systems that would connect producers and consumers of renewable energy. The project has ...

The Croatian battery news came in the wake of plans for a standalone utility-scale battery storage system in Serbia. The office of the Mayor of Leskovac revealed plans for a 125 MWh containerized ...

By embracing advanced energy storage, Croatia is not just aligning with EU energy policies but is also setting a precedent for the region's transition to a low-carbon economy.

The European Bank for Reconstruction and Development (EBRD) is providing a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock ...

Croatian aluminium processing company Impol-TLM, a subsidiary of the Slovenian Impol Group, has received 19.8 million euros in funding from the Modernisation Fund to build the second phase of a 60 ...

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development (EBRD), the bank announced.

We specialize in large-scale energy storage systems, mobile power stations, distributed generation, microgrids, containerized energy storage, photovoltaic projects, photovoltaic products, solar industry solutions, ...

This article examines ATESS' pivotal role in transforming Croatia's industrial sector through advanced energy storage solutions, highlighting key projects across various factories and ...

The study will take into account the broader regional context and the accelerated growth of renewable energy sources, not only in Croatia but throughout Southeast Europe, including an analysis of the ...

Croatia Energy Storage and Energy Storage
