

The development will support the installation of up to 60 megawatts of grid-connected battery storage capacity and the deployment of a VPP platform, allowing real-time balancing of ...

The Zagreb lithium battery energy storage project demonstrates how smart energy solutions can power sustainable industrial growth. As battery costs continue to decline and efficiency improves, now is the ...

The project, valued at 60 million, marks the first step toward creating a virtual network of battery storage systems that would connect producers and consumers of renewable energy. The ...

The Croatian government has allocated almost EUR20 million (\$23.2 million) of European Union Modernization Fund grants to help complete a 60 MW/120 MWh battery energy storage ...

The project involves the construction of a sophisticated 60 MW battery energy storage system (BESS) combined with a virtual power plant (VPP) in Sibenik.

Croatia's first battery energy storage facility connected to the national transmission grid is taking shape near Sibenik, marking a significant step in modernising the country's energy...

The European Bank for Reconstruction and Development (EBRD) said on October 22 it will invest EUR16.8mn in Croatia's first large-scale battery energy storage system and virtual power plant, taking its ...

As a well-connected part of Southeast Europe's power system, with extensive interconnectors, Croatia now faces the central challenge of integrating battery storage into the grid ...

The European Bank for Reconstruction and Development (EBRD) has announced a direct equity investment of up to EUR16.8 million in IE-Energy Projekt, a newly established joint-stock ...

Croatia is moving forward with its largest grid-scale battery energy storage project thanks to a new investment from the European Bank for Reconstruction and Development (EBRD), the bank ...

Croatia Industrial Battery Energy Storage
