It would seem so for one Czech energy company that was forced to unplug hundreds of solar panels on Easter Monday after they generated more power than the grid could handle.

Get the latest Czech energy news. The government is revamping its solar energy strategy with new subsidies and streamlined laws to boost renewables. [Learn more.](#)

Investment subsidies and the sharp fall in photovoltaic panel prices in recent years have both contributed to the surge. The study highlights that solar generation in Central Europe, namely in...

In his EU Monitor, Jonathan Lyons writes about the future of solar energy in the Czech Republic. "Harnessing the full potential of solar energy will not only help to meet the EU's ...

Electricity use was low in the Czech Republic on Monday due to the Easter holidays. But sunny weather meant that the country's solar plants produced a huge surge of energy. To protect the...

A set of two measures aimed at reducing state subsidies for renewable energy sources has been approved by the lower house of Parliament in the Czech Republic on 11 December 2024.

The Czech Republic had almost two gigawatts (GW) of photovoltaic capacity at the end of 2010, but installed less than 10 megawatts (MW) in 2011 due to the feed-in tariff being reduced by 25%, after installing almost 1,500 MW the year before. Installations increased to 109 MW in 2012. In 2014, no new installations were reported. Source: Photovoltaic Barometer: Energy-Charts , Fraunhofer Institute for Solar Energy Systems

Permitting delays and insufficient financing are hindering solar deployment in the Czech Republic, according to local industry group Solární Asociace. In the first half of 2025, distribution ...

While not the sunniest country in Europe, Czechia offers strong foundations for solar growth thanks to its stable energy infrastructure, reliable sunlight, and expanding government incentives.

Czech Republic hard work on solar panels
