

The Kremlin's forces have been striking Ukraine's energy generation and distribution facilities almost daily. Attacks on November 25 alone left more than 40,000 people without power in the Kyiv region, ...

Looking ahead, the EU should apply the lessons from Ukraine to strengthen its own energy system - building resilience and removing structural vulnerabilities. One critical area is in the power grid: ...

In 2024, energy in Ukraine faced an infrastructure crisis unprecedented in its national history as a result of sustained Russian military attacks on its power generation facilities and transmission networks, in addition ...

Energy Minister Denys Shmyhal reported &quot;a cascade shutdown&quot; in Ukraine's power grid in the morning on Jan. 31.

The problem is that electricity generated by these surviving capacities cannot be evenly distributed across all of Ukraine. Due to the nature of any energy system in any country, uniform distribution is ...

While diesel gensets can power neighborhoods, aeroderivative turbines can power entire towns at a much lower electricity cost. Ukraine will need gigawatts of power, which means that at an average turbine ...

Russian strikes target energy infrastructure across Ukraine, knocking out power, damaging power plants and deepening winter hardship. Meanwhile, Trump wants the war to end by June, Zelensky says.

The overnight strikes hit high-voltage transmission lines that are used to transmit electricity nationwide and that form the backbone of Ukraine's power grid, as well as power plants and ...

Hundreds of thousands of electricity distribution lines, substations, and high-voltage transformers have been destroyed, and power generation plants of all kinds remain targets for Russian strikes.

This report describes the urgent challenges facing Ukraine's energy sector and outlines tangible actions that can be taken by Ukraine and its partners to address its immediate energy security vulnerabilities ahead of the ...
