

Competition with Asia to bring the battery value chain to Europe intensifies as mining company Finnish Minerals Group and battery cell manufacturer Freyr Battery explore the possibility ...

Celltech is Finland's leading designer and manufacturer of battery systems and an importer of special batteries. Together with Nordic sister companies, Celltech Group is the largest player in the field in ...

From thermal resilience to modular flexibility, customized lithium battery packs are rewriting Finland's EV playbook. Whether you're retrofitting a fleet or launching new models, tailor-made solutions deliver ...

The strategy focuses on building an innovative ecosystem in the battery sector and supporting Finland's sustainable, low-carbon economic growth. The battery strategy will also contribute to the ...

Sweco supports customers from the raw material sourcing and the production of battery chemicals, anode and cathode active materials to the manufacturing of finished cells, modules and battery packs.

DLCPO is a leading developer and producer of high-tech lithium-ion, li-polymer, lifepo4, and li-ion battery systems for consumer electronics, digital devices, GPS tracking systems, home ...

Discover why Finland is emerging as Europe's lithium giant, leading the charge in sustainable mining and powering the future of EV batteries.

The wide range of our state-of-the-art CellPac LITE battery packs includes batteries with UL 2054 and IEC 62133 certifications, thereby significantly reducing the design-in cost and time-to-market for our ...

We have an excellent platform for battery cell and pack manufacturing in Vaasa. Vaasa is a prime location for battery manufacturing due to its unique combination of natural resources, low-cost green ...

The three-year project continued the work of the first major national battery research ecosystem, the BATCircle project (2019-2021). The project combined the research needs and raw ...

Finnish large-cell lithium battery pack
