

What are photovoltaic sun shading systems?

Integrated energy generation and shading: Unlike traditional materials, photovoltaic sun shading systems provide not only shade but also generate renewable energy. These systems create a more efficient, sustainable solution by transforming passive architectural elements into active energy producers while controlling solar heat gain.

Why did Safran choose IDEX for a photovoltaic project?

Safran, the world's second-largest aerospace equipment supplier, has chosen IDEX to help it deploy photovoltaic infrastructures at 9 of its sites in France. The project consists of both ground-based power plants and photovoltaic shading systems, which together will cover almost 25% of the Safran sites' energy needs.

What is photovoltaic brise soleil?

Photovoltaic brise soleil integrates solar power into building designs, enhancing aesthetics, functionality, and energy efficiency.

How do photovoltaic sunshades work?

Photovoltaic sunshades can be installed in a mobile version, allowing you to adjust the angle of the glass element. With the help of an optional set of sensors (temperature, light intensity, GPS, wind speed) constituting a weather station and a properly programmed logic controller (PLC), the slat inclination angle can be changed automatically.

What are PV-Sunshades? The latest and innovative way to use the shades to protect the assets and structures from the harsh sun rays is Photovoltaic Sunshades. Like any ordinary shades, ...

Install photovoltaic shading on your car park Make the most of the space available in your car parks by installing photovoltaic shading systems to protect the vehicles of your employees and ...

Photovoltaic brise soleil integrates solar power into building designs, enhancing aesthetics, functionality, and energy efficiency.

Safran, the world's second-largest aerospace equipment supplier, has chosen IDEX to help it deploy photovoltaic infrastructures at 9 of its sites in France. The project consists of both ground-based ...

The main purpose of a solar shade is to maximize solar electricity production by optimally exposing the photovoltaic panels to sunlight. Solar carport : A solar carport is a structure that combines a vehicle ...

Multi-functional sun shade and canopy system in compliance with the criteria defined by SUPSI () offering both sun shading + PV solar energy production Optional tilting and motor ...

Vision Systems' genuine expertise in solar protection places it today among the world leaders in this area for the aeronautic, land transport, special vehicle and marine markets. The range comprises ...

French photovoltaic sunshade

This 20-year contract calls for the installation of photovoltaic shading systems on the parking lots of 90 Carrefour hypermarkets and 260 supermarkets in France, representing the ...

Photovoltaic system shade structures made of steel, wood or concrete are common. Much less so are those made of aluminum, the material used for their construction by Closures, a ...

The ML Lamela (PV Solar Shading System) can replace classic, e.g. aluminum blinds, louvers with integrated photovoltaic modules, which are also a source of clean renewable energy. PV ...
