

How much does JA Solar panels cost

Are JA Solar panels cheaper?

The nationwide average cost per watt for a solar panel installation is \$3.03, so JA solar panels are significantly cheaper. Those are the averages, but the total cost for a solar installation will vary per project, and the price can change based on factors like local labor cost, distribution, state solar rebates and incentives, and more.

Is JA Solar a good company?

JA Solar has a strong manufacturing foundation: established in 2005, JA Solar has proven production capabilities with multiple global facilities and billions in annual output. JA Solar panels are known to be very affordable and efficient. Since it is a Chinese company, the panels can be hard to come by in the US.

How much do JA Solar panels cost in the UK?

JA Solar panel prices start at £80 and go up to £170 in the UK. Higher output models are generally more expensive. The panels might be subject to import fees depending on where you live, so exact prices may vary. Compared to other companies, they are fairly affordable. The table below compares some of the most popular solar panels in the UK.
