

How much does it cost to install photovoltaic panels in a house

How much does solar panel installation cost?

Let's look at how much solar panel installation costs. The cost of solar panels varies hugely depending on the type and size of the system you require. A 4kW photovoltaic (PV) system, suitable for a 2-3 bedroom house typically costs around £8,000 (incl. installation). Including an inverter and solar battery takes the average cost to around £12,000

How much do commercial solar panels cost?

Solar panels for businesses. Commercial solar installations are a great way for companies to lower energy costs. Generally, installing solar panels on businesses costs a bit less per watt because the systems are larger, but the total costs will be higher. In 2025, the average cost for commercial solar panels is just about \$2.00 per watt.

How much does a home solar system cost?

According to studies by the U.S. Department of Energy, the all-in cost of a home solar panel system is between \$2.74 to \$3.30 per watt. ^{1,2,12} This figure includes the solar panels, the installation, and other expenses. Using these numbers, an average-sized 8-kilowatt residential solar system would cost between \$21,900 - \$26,400.

Will adding a solar battery increase my solar panel installation costs?

Adding a solar battery will increase your solar panel installation costs. Generally speaking, it's more cost-effective to install your solar battery system at the same time as your solar panels (rather than adding it later on). Read our solar battery storage system cost guide for more detailed information.
