

Huawei solar container lithium battery pack cqc voluntary

This rule applies to the scope of portable electronic equipment with lithium-ion battery and battery pack will be CCC certification management, so the new CCC catalogue issued by the CNCA, ...

The Huawei LUNA2000-S0 PV battery is a modular solution that is flexibly tailored to your needs. With options of 5 kWh, 10 kWh or 15 kWh and extensions up to 30 kWh, it adapts to your requirements.

When connecting several battery packs in series, you will create a battery rack (or battery string). Usually, the battery rack provider is the same company that designed the battery module.

The SAMR has decided to introduce compulsory product certification (CCC Certification) for lithium-ion batteries and battery packs.

In summary, CQC certification for lithium batteries is a mandatory requirement for their sale and use in China, ensuring that products meet national standards and market regulatory requirements.

Intelligent lithium batteries that combine cloud, IoT, power electronics, and sensing technologies will become a comprehensive energy storage system, releasing site potential.

Battery pack failures are detected in real time and data is transmitted to the Huawei SmartPV Management System, which issues effective warnings in the event of problems in the ESS.

Refer to battery warranty letter for conditional application. Storage system is ordered and delivered in the form of power module and battery module separately with corresponding quantity.

The application of the CQC mark indicates that the product meets the relevant quality, safety, performance, electromagnetic compatibility and other certification requirements.

The CQC has clarified that existing certificates will remain valid. The transition to the new rules will be managed smoothly through natural events like certificate renewals, modifications due to product ...
