

Listed below are the five largest energy storage projects by capacity in India, according to GlobalData's power database. GlobalData uses proprietary data and analytics to provide a ...

At the heart of this momentum is the strategic push by the Government of India and various state authorities, backed by institutions like SECI, NTPC, and SJVN, to advance energy ...

India will require 60.63 GW of energy storage capacity by 2029-30 to support its fast-expanding renewable energy base and ensure grid reliability, according to a report by the Central ...

Three initiatives, regulations or policies related to decentralised energy storage have been updated or introduced by the relevant agencies at the national or state level.

Power producer National Thermal Power Corporation (NTPC) will deploy Energy Dome's CO<sub>2</sub> Battery technology at a power plant in Karnataka, India.

India has set a target to achieve 50% cumulative installed capacity from non-fossil fuel-based energy resources by 2030 and has pledged to reduce the emission intensity of its GDP by ...

With IFC's support, we are proud to lead the deployment of one of India's first and largest BESS assets in Gujarat. This project represents a strategic milestone in building next-generation ...

Setting the stage for energy storage in India of 175GW of renewable energy by 2022 and clean energy storage. This article explores the opportunities and challenges ahead of the energy storage sector ...

India's battery energy storage capacity is set to rise nearly ten-fold to around 5 GWh in 2026 from 507 MWh in 2025, reflecting a shift from tendering to execution of projects.

The report, Strategic Pathways for Energy Storage in India Through 2032, tackles these questions. With its sharp analysis and data-driven approach, it maps out practical, affordable ways to roll out storage, ...
