

# Is Armenia suitable for solar power generation

Solar energy production in Armenia has reached a new level. Armenia continues to actively expand its solar energy sector, aiming to increase the share of renewable energy production ...

Energy specialist Vahe Davtyan argues that Armenia's rapid expansion of solar power is creating energy system risks due to lack of proper integration, storage strategy, and coordination ...

The number of household solar power plants grew by 60% in 2025, according to an Armenian press briefing, while their capacity grew by 52% year-on-year. Armenia previously ...

In 2019, the European Union announced plans to assist Armenia towards developing its solar power capacity. The initiative has supported the construction of a power plant with 4,000 solar panels ...

Overview Potential Photovoltaics Thermal solar See also External links Solar energy is widely available in Armenia due to its geographical position and is considered a developing industry. In 2022 less than 2% of Armenia's electricity was generated by solar power. The use of solar energy in Armenia is gradually increasing. In 2019, the European Union announced plans to assist Armenia towards developing its solar power capac...

Armenia enjoyed a record year for solar deployment last year, surpassing 1 GW of cumulative solar capacity. The market is currently led by autonomous solar producers, of which there ...

Armenia has significant solar energy potential: average annual solar energy flow per square metre of horizontal surface is 1 720 kWh (the European average is 1 000 kWh), and one-quarter of the ...

Armenia's geography provides an ideal setting for solar power generation, with over 2,500 hours of sunshine annually. Recognizing this potential, the government introduced policies and ...

Armenia's mountainous terrain and 300+ annual sunny days make it an ideal candidate for photovoltaic systems. The Gyumri Solar Project - operational since 2022 - stands as a 12 MW clean energy hub, ...

Armenia offers a growing and stable solar energy market, supported by strong irradiation, supportive regulations, and a transition to clean energy. From rooftops in Yerevan to agriculture in Ararat, solar ...

In recent years, the field of solar energy in Armenia has developed rapidly. Solar power plants with a total installed capacity of 1,045 megawatts are already connected to Armenia's power ...
