

# Is it good to install photovoltaic panels on the roof of an old house

Should you install solar panels on your roof?

The pros and cons of solar panels on roof installations have become a popular topic as more homeowners consider transitioning to renewable energy sources. Incorporating solar panels into your home not only reflects a commitment to the environment but also presents a range of practical and financial implications.

Can you replace a roof with solar panels?

Simply put, you can't replace a roof while it has solar panels on it. So, when a home with roof-mounted solar panels needs a new roof, the solar panels have to come down. Modern solar panels for homes and businesses are often guaranteed to produce energy efficiently for 25 to 30 years. In theory, that's not a major issue.

Do roof-mounted solar panels need a new roof?

So, when a home with roof-mounted solar panels needs a new roof, the solar panels have to come down. Modern solar panels for homes and businesses are often guaranteed to produce energy efficiently for 25 to 30 years. In theory, that's not a major issue. If both are ready to be replaced at the same time, it might even be convenient.

When should you install solar panels on a new roof?

Solar panels and roof shingles have similar life spans, so it makes sense to install roof-mounted solar panels soon after you get a new roof. If you put new solar panels on an older roof, you may have to take them down and reinstall them when it's time to replace your roof.
