

Is solar photovoltaic power generation possible in rental properties

Should you install a solar system on your rental property?

For tenants, the main benefit is that you can get lower power bills during the term of your lease. Landlords who install a solar system on their rental property can recover the installation costs through the rent paid for the property.

Are solar panels a good option for a rental property?

Solar panels can be an energy-efficient solution for rental properties and can offer a consistent and long-term performance. When installed on a rental property, solar panels contribute to reducing the property's carbon footprint and reliance on non-renewable energy sources.

Can a landlord increase rent if a tenant installs a solar system?

Landlords who install a solar system on their rental property can recover the installation costs through the rent paid for the property. If the rent goes up to cover these costs, the rent increase should be less than the amount the tenant saves on their power bill. Otherwise, the tenant will be worse off.

Can You charge tenants for solar power?

You can charge tenants for solar power produced by the solar panels on a rental property. This can be done by integrating the solar energy generated into the tenants' utility bills or through a separate line item charge.

Suitable Properties Benefits For Landlords and Tenants Solar For Rentals Calculator Solar Power Consumption and Feed-In-Tariffs Solar System Costs and Tax Implications For Landlords Solar System Responsibilities Solar System Maintenance More Information Solar power typically works best on detached rental properties (such as houses, townhouses or duplexes) with a solid, sunny roof that can support a larger solar system of 5 kilowatts or greater. Electricity bill savings for tenants are typically greatest where the tenant is home during the day to use as much of the solar power generated as possible...
