

Israel Communications 5G Base Station Project

Israel launched its 5G network in September 2020, less than two years after the technology was introduced, and it would have launched sooner were it not for financial issues holding the project back.

The Ministry of Communications is promoting the deployment and operation of 5G technology in Israel, which enables the provision of broadband mobile services and which will lead to the development of new ...

Through initiatives like the HERON Consortium - a collaboration among 13 industrial partners and 15 research teams across six academic institutions - Israeli innovators are working intensively to build the ...

The new "Innovation Band" will allow companies and institutions -- including industrial plants, universities, ports, and local authorities -- to operate geographically limited 5G networks at low cost.

Pelephone activated a 5G network core in Israel, launching MAX G5 network. New packages offer enhanced customer experience with high-speed browsing, calls, and network prioritization.

The Communications Ministry and Israel Innovation Authority on Monday published a call for grants for the promotion and development of pilots based on 5G technologies.

The purpose of the program is to support the expansion of the use of the 5G network in Israel and to develop innovative applications based on the infrastructure.

Earlier this month, the Israeli Ministry of Communications and the Israel Innovation Authority have launched their sixth clarion call for grants to start-up companies and innovative application developers that ...

Israel's Communications Minister Shlomo Karhi on Tuesday announced the establishment of an interministerial team to accelerate the adoption of 5G (fifth generation) technology for broadband cellular ...

As part of the new legislation, entrepreneurs will be able to operate radio equipment that supports 5G technology for a public network of one or more cellular companies and provide up to 40% of the ...
