

London Container Battery Calibration

We offer a complete battery testing service, at both an investigative R& D and homologation level. This includes climatic and life testing, abuse testing, and module and pack tear down and recycling.

Our battery storage containers also come complete with controlled explosion venting and banded storage for contaminated liquids to help prevent uncontrolled release into the environment.

The British Association of Removers' "Battery Risk Management Guide" is instrumental in highlighting the complexities and risks involved in shipping Li-ION batteries internationally.

Our experts check the quality of every battery upon arrival, and again when it leaves our warehouse. Constant monitoring ensures ideal temperature and humidity levels for battery storage.

The Calibration Centre service & calibrate test equipment. Buy your Megger, Seaward, Kewtech & Fluke test equipment from our online store.

For full IMPRES functionality, a new IMPRES battery must be initialised / calibrated by the IMPRES charger. The IMPRES charger will automatically detect the new IMPRES battery and automatically start the ...
