

# Mauritania solar Charging Pile Energy Storage Investment

The agreement, signed on September 12, 2025 in Nouakchott, marks Mauritania's first large-scale public-private partnership (PPP) for renewable power.

The project will finance Mauritania's first large-scale battery energy storage facility, enabling the country to harness its abundant solar and wind resources for more reliable electricity.

Featuring an impressive 160 megawatts (MW) of solar power, 60 MW of wind energy, and a robust 370 megawatt-hours (MWh) battery storage, this project is not just a power plant; it's a beacon of ...

Mauritania's Ministry of Economy and Finance said this new phase of the rural electrification project will contribute to enhancing the capabilities of solar power plants, and developing small distribution ...

On 12 August 2025, Mauritania's Minister of Energy and Petroleum, Mohamed Khaled, announced a strategic renewable energy project with a total investment of \$287 million, aimed at expanding the country's clean ...

Featuring an impressive 160 megawatts (MW) of solar power, 60 MW of wind energy, and a robust 370 megawatt-hours (MWh) battery storage, this project is not just a power plant; it's a beacon of sustainable ...

With an investment of \$287 million, the project includes the construction of two renewable energy plants: a solar power plant in Nouakchott and a wind farm in Boulénouar.

The PIEMM will boost solar energy production and provide access to electricity for more than two million people in Mauritania and Mali, while also enhancing regional integration and trade.

Mauritania has received the finance to implement two energy projects that encompass solar power generation, transnational electricity interconnection and rural electrification.

The agreement, signed in Nouakchott, is part of a bilateral cooperation initiative between the two countries, focused on supporting Mauritania's energy infrastructure.
