

Existence of microclimatic conditions in tropical island poses a challenge to integrate a greater share of renewable energy, more specifically solar energy into the power grid.

Astronomical viewer to see the position of the planets, the moon, the sun and other celestial bodies from Plaisance Mauritius for any date and time. Animations in real time and animations programmed in ...

Online 3D simulation of the Solar System and night sky in real-time - the Sun, planets, dwarf planets, comets, stars and constellations

Explore the 3D world of the Solar System. Learn about past and future missions.

An empirical model was developed to predict SPV yield based on climatic parameters with less than 15% deviation in most cases. The study aims to optimize energy resource management in Mauritius ...

The objective of the current study is to model the global solar irradiation climate of Mauritius using regression equations available in literature in an attempt to provide solar farm ...

The Solar System Simulator is a graphical engine which will produce simulated views of any body in the solar system from any point in space.

The properly-scaled, basket-ball-sized model is 1.3 miles (2.14 km) from the model Sun which is located at the museum, graphically illustrating the immense empty space in the Solar System.

An interactive and free tour of the solar system. This stunning solar system model lets you explore the entire solar system, from the Sun to Pluto.

The NAAP Solar System Models Lab introduces the universe as envisioned by early thinkers culminating in a detailed look at the Copernican model. First time users of NAAP materials should ...

Mauritius nanuan solar system model
