

# Mobile cabinet transaction system for subways

The EverServ POS system isn't just confined to in-store transactions; it integrates mobile and online orders and kiosk interactions into Subway's workflow seamlessly.

An Automated Fare Collection System (AFCS) is a combination of hardware, software, and communication systems that allow passengers to purchase tickets or passes and validate them.

Let's examine Subway's POS system in detail: what it is, how it works, and why it is so effective for the build-your-own sandwich company that has taken over the globe.

Learn More About Contactless Cards Learn More About Digital Wallets Choose How to Pay and Be on Your Way Digital wallets are mobile applications that allow you to make payments with smart devices, such as your smart phone, smart watch, or wearable.
