

New energy storage new power system

A new, floating pumped hydropower system aims to cut the cost of utility-scale energy storage for wind and solar farms.

Global demand for energy storage is surging. Lithium-ion leads today, but new contenders like sodium-ion, flow, and gravity systems are shaping the future grid.

State-owned energy company Synergy has completed the 500MW/2,400MWh Collie Battery Energy Storage System (CBESS) in Western Australia, establishing Collie as home to Australia's largest ...

The rapid development of new energy and energy storage technologies is vital for building a green and low-carbon smart grid. While significant progress has been achieved, systematic solutions remain ...

On December 20, 2024, the U.S. DOE released the draft Energy Storage Strategy and Roadmap, which identified LDES as a strategic breakthrough area in U.S. energy strategy and a crucial solution ...

EnerSys® will preview their new NexSys(TM) BESS energy storage system and Synova(TM) Sync charger concepts at upcoming LogiMAT and ProMat trade shows.

Based on a brief analysis of the global and Chinese energy storage markets in terms of size and future development, the publication delves into the relevant business models and cases of new energy ...

Energy storage is one of the hot points of research in electrical power engineering as it is essential in power systems. It can improve power system stability, shorten energy generation ...

Here are ten notable innovations taking place across different energy storage segments, as highlighted in GlobalData's Emerging Energy Storage Technologies report.

How are startups advancing energy storage for the clean energy era? Discover 10 Battery Storage Startups to Watch in 2026 and their cutting-edge solutions! From utility-scale BESS and ...
