

Photovoltaic panel installation recruitment advertisement

Can a qualified electrician fit solar panels to a building?

If you're a qualified electrician you could take a short training course in the installation and maintenance of small solar photovoltaic (PV) systems. This would allow you to fit solar panels and connect them to a building's electrical mains network. You could take solar PV training to fit solar panels to buildings if you're a qualified roofer.

Who are solar specialist staff?

From solar manufacturers and installers to storage facilities, our track record has seen us place specialist staff across the full value chain in the solar industry: Manufacturers, Developers, EPC Contractors, Utilities, Operators, Asset Managers, Investors and Consultancies.

How do I become a solar installer?

You could start as an installation labourer, working with qualified installers, and do training on the job with the support of your employer. If you're a qualified electrician you could take a short training course in the installation and maintenance of small solar photovoltaic (PV) systems.

Why do European EPC clients need a team of solar specialists?

Having won a major project in the UAE, our European EPC client urgently needed to recruit a large team of solar specialists to begin work on a solar power plant site as soon as possible. Our client is an independent power producer.
