

I'm working on a Power Automate flow that updates items in a SharePoint Online list. However, I'm facing an issue where certain columns (including Person/Group fields) are not ...

Extract Value from Array in Power Automate Asked 1 year, 3 months ago Modified 10 months ago Viewed 7k times

Send an HTTP request to SharePoint action in Power automate flows works with SharePoint REST APIs. Follow below Microsoft official documentations for SharePoint REST API ...

An overview of molten salt energy storage in commercial concentrating solar power plants as well as new fields for its application is given.

Premier Resource Management (Bakersfield, CA), in partnership with the National Renewable Energy Laboratory, will develop a 100-kWe demonstration power plant with more than 12 hours of storage ...

Is this just part of the building process? Or If I have one query A that loads across the network and 5 follow up queries that refer to query A will power query / excel be reading the across ...

I signed out and in multiple times in &quot;power automate&quot;. I also opened the &quot;sharepoint app&quot; in Office365 (whatever you're supposed to do with it) which worked fine. The sharepoint connector in ...

MS energy storage technology is an advanced method used in solar thermal power generation systems for storing and releasing thermal energy. This approach employs MSs, typically a mixture of potassium and ...

Discover how converting sunlight into stored heat using molten salt allows solar towers to generate a continuous, reliable supply of renewable electricity.

when opening my report user-confusion may arise from the fact that a date slicer is not automatically extended to the current date of data available. My question therefore is: Does anyone ...

Improved molten salt technology is increasing the efficiency and storage capacity of solar power plants while reducing solar thermal energy costs. Molten salt is used as a heat transfer fluid (HTF) and thermal energy ...

You are confusing Power Automate with Power Automate Desktop. The link you provide is for Power Automate, so those functions won't work in the PADesktop. There is an action named ...

# Power generation with solar molten salt

In this type of system, cold molten salt is pumped to the top of the power tower containing the receiver, where it is heated by the concentrated solar power. It then flows to a hot storage tank, which stores ...

Concentrating solar power (CSP), also known as solar thermal electricity, is a commercial technology that produces heat by concentrating solar irradiation. This high-temperature heat is typically ...

I use Power Automate to collect responses from a Form and send emails based on the responses. The main objective is to automate decision-making using Python to approve or reject the ...

Completed the TES system modeling and two novel changes were recommended (1) use of molten salt as a HTF through the solar trough field, and (2) use the salt to not only create steam but also to preheat the ...

The state-of-the-art concentrating solar power (CSP) system is assumed to be a molten-salt power tower employing a 60:40 weight percent blend of sodium and potassium nitrate commonly known as "solar salt" at ...

Create HTML table from array of Objects in Power Automate Asked 1 year, 4 months ago Modified 1 year, 3 months ago Viewed 7k times
