

In Micronesia, Yap island seeks bids on a 79 kW solar plus storage minigrid system. A new hybrid minigrid that will provide clean, reliable and efficient energy supply to residents of Tonga was ...

By providing clean and affordable electricity, the project is expected to improve the quality of life for residents, support local businesses, and promote economic growth. Moreover, the mini grids will ...

This paper serves as a link between scientific advancements and field-proven best-practices for designing microgrids in rural communities.

Thousands of families across the Federated States of Micronesia (FSM) will benefit from better, more reliable electricity under a new project to be implemented by the Government of FSM with financing ...

One of our latest projects, funded by the Asian Development Bank (ADB), aims to bring electricity to some of the nearly 40,000 people who live in remote villages dotted across the ...

Yap State Public Service Corp. is seeking bids to supply solar minigrids with battery energy storage systems (BESS), totaling 79 kW, for Yap Island in the Federated States of Micronesia....

The Federated States of Micronesia are investing in solar micro-grids and battery energy storage systems as well as capacity building to increase self-sufficiency and reduce emissions.

In this paper, a review of recent developments in rural electrification through micro-grids is presented. This work first lays the background on the challenges hindering the mass deployment of ...

Whether they're called microgrids or minigrids (another term for remote microgrids that are not connected to a centralized grid), the electricity delivered by the technology has been proven to drive ...
