

Discover how a profitable solar power project is created step by step. The preliminary study maps solar radiation conditions, land use and grid connection options. Profitability depends on, among other ...

When solar power is combined with energy storage and smart grid technologies, it improves the flexibility of the electricity grid. Solar panels can be installed in many different ways on buildings and land ...

Summary: Discover how solar PV panel specifications adapt to Tampere's unique climate. Learn about efficiency ratings, temperature resilience, and installation best practices tailored for Finland's snowy winters ...

By combining the complementary expertise of Tampere University, VTT, and Aalto University in both perovskite and crystalline silicon technologies, STEIN aims to build a strong material-level foundation for developing ...

The increasing amount of VRES in Finland, mainly wind but also solar photovoltaics (PV) [5], creates challenges to the power system, and the mismatch between the timing of power production and ...

SOL-TECH's main goal is to co-design and develop solar-powered smart tags and sensors that can be integrated into home environments to prevent and monitor falling, hence supporting the independent living of ...

From vast solar parks to smart fabrics and solar-powered food production, Finnish researchers and companies are transforming low-light conditions into high-impact innovation.

Sanoma has commissioned a solar power plant in Helsinki and Tampere. The solar power plant at the Sanoma House in Helsinki started up in early June and the Manu printing house in Tampere will be ...

FSR is a joint research project of three universities on control and optimization of solar photovoltaic power production under variable climatic conditions and on connecting them to different types of power grids.

Discover how Tampere, Finland's third-largest city, is leveraging photovoltaic systems and advanced energy storage to combat climate challenges. This article explores practical applications, local success stories, and ...

Smart follow-up solar design in tampere finland
