

France deployed 5.9 MW of solar in 2025, according to new data released by French grid operators Enedis and RTE. The figure set a new record for France's PV sector, surpassing the 4.6 GW...

In 2024, France set a new benchmark for PV deployment, installing over 6 GW of new PV capacity. This marks the strongest year on record for PV in France, underscoring the country's commitment to accelerating its ...

Solar panels installation in France: Find out the costs, incentives (reduced VAT, grants), planning, average use, & insurance considerations.

The total number of solar installations exceeded 1 million at the end of the reporting period. French grid operator Enedis said that its network exceeded 1 million renewable energy installations in Q3 ...

In 2023, the PV energy capacity in France amounted to approximately 20.5 gigawatts, making France the fifth European country for cumulative PV capacity that year. Despite this high ranking,...

France installed 4GW of solar PV capacity in 2023, a "record" according to the International Energy Agency's Photovoltaic Power System Programme (IEA PVPS).

Total Installed Capacity: In 2023, France installed 4.0 GW of new PV capacity, bringing the cumulative total to 24.6 GW. This includes 2.5 GW of decentralized PV and 1.45 GW of centralized PV.

Exclusive list of the top French PV-installers. Contains contact details, information about management, certification and more.

"As of September 30, 2024, the [power capacity of photovoltaic solar parks] reached 23.7 GW, including 22.9 GW in mainland France. The newly connected power is 3.5 GW over the first three...

Recent data released by Enedis, France's electricity distribution network operator, shows that the country's grid added 4.2 gigawatts (GW) of new solar photovoltaic (PV) capacity in the first nine months ...
