

Solar module export data in the first three quarters

Each quarter, the National Renewable Energy Laboratory conducts the Quarterly Solar Industry Update, a presentation of technical trends within the solar industry. Each presentation focuses on global and ...

In September 2024, China exported about 6.8 GW of solar modules to the European market, down 17% from August and 11% year-on-year.

Trina Solar's cumulative shipments of 210mm modules exceeded 90GW as of Q3 2023, ranking first globally. By the end of October cumulative shipments of Trina Solar's 210R modules exceeded 15GW.

First Solar reported results for the third quarter ended September 30, 2025, with higher revenue and profitability driven by strong demand for its solar modules and strategic manufacturing expansion in the ...

o According to EIA data, 40% of 2024 installed U.S. solar capacity occurred in Q4--relatively consistent with previous years, though much greater in absolute terms.

As the industry's "first tier," their core advantages lie in "globalized layout + supply chain control." Based on the data we obtained, leading companies generally have overseas shipment proportions exceeding ...

The U.S. Energy Information Administration (EIA), the statistical and analytical agency within the U.S. Department of Energy (DOE), prepared this report. By law, our data, analyses, and forecasts are ...

Risen Energy, DAS Solar and Yingli Solar are in the race for 9th to 10th place with shipments of 14GW to 15GW in the first three quarters of 2024. Competition for the 9th and 10th positions is quite fierce, ...

Texas installed the most solar capacity in the first half of 2025 (3.8 GW dc), followed by California, Indiana, and Arizona. In Q2 2025, the residential segment installed 1,064 MW dc of solar capacity, declining ...

Indian solar module and cell exports increased 26.1% quarter-over-quarter (QoQ) to \$267.6 million (~INR23.1 billion) in the first quarter (Q1) of 2025 from \$212.2 million (~INR17.92 billion), according to recent ...
