

The EU is advancing several key projects and initiatives in the energy storage field to boost renewable energy integration, stabilize the grid, and support clean energy goals.

Slovenian energy company GEN-I said on Thursday that it has signed a five-year optimisation agreement with Polish renewable energy projects developer R.Power Renewables for a ...

As the renewable energy sector rapidly evolves, battery energy storage systems (BESS) are emerging as a critical pillar for decarbonization. However, with capital constraints and rising ...

This article explores market trends, application scenarios, and actionable insights for businesses considering energy storage solutions in Spain, Italy, Greece, and Portugal.

Algeria, Austria, Germany, Italy, and Tunisia have signed a declaration to develop the Southern Hydrogen Corridor, a 3,500 km to 4,000 km project to transport hydrogen from North Africa to Europe

In Europe, the capacity of renewable energy sources is growing very rapidly, while traditional power plants are slowly being decommissioned. That's creating a unique new opportunity ...

The strategic partnership will focus on developing greenfield battery energy storage system (BESS) projects to ready-to-build status across the three markets, with further expansion ...

Nuveen, formerly Glennmont Partners, is a London-headquartered investor active in clean energy and battery energy storage systems internationally. It commissioned a 30MW BESS in ...

If we apply the same focus and ambition to storage that we once did to solar, Europe can build a resilient, renewables-based energy system faster than many think.

The selected projects range from large-scale battery systems to industrial thermal storage and new pumped-hydro plants, reflecting both the technological maturity of the sector and ...
