

Tuvalu community microgrids

Following the successful commissioning of the Tafua Pond system, feasibility work is now underway to assess options for scaling similar installations to other islands and coastal communities, alongside ...

Billion Group implemented innovative solar-plus-storage microgrid solutions in Palau, the Marshall Islands, and Tuvalu to achieve energy independence and low-carbon development, setting a ...

Taiwan-based Billion Electric Group has successfully implemented advanced solar-plus-storage microgrid systems across Palau, Tuvalu, and the Marshall Islands. These installations aim to ...

Tuvalu has committed to sourcing 100% of its electricity from renewable energy. This is considered possible because of the small size of the population of Tuvalu and its abundant solar energy ...

These modular microgrids reduce reliance on imported fossil fuels, ensuring stable green energy supply for agriculture, aquaculture, and local communities.

“We develop flexible and scalable microgrid solutions for diverse applications, enabling the energy transition in off-grid and remote regions. By fostering local service teams and forming ...

Two Parts of the Project Part 1 - SHS System for household, Meeting Hall and Church Part 2 - Community Deep Freezer to drive economic activities

These modular microgrids reduce dependence on imported fossil fuels, ensuring a stable green energy supply for agriculture, aquaculture, and local communities.

The modular renewable energy microgrid systems, which include a total of 495 kW peak (kWp) of solar and 1,997 kWh of battery energy storage, were deployed on Palau, Tuvalu and the ...

In collaboration with Taiwanese partners, Billion Electric has successfully installed 495 kWp of solar photovoltaic (PV) systems and 1,997 kWh of battery energy storage systems (BESS) ...
