

Western European Chemical Energy Storage Project

Harmony Energy has successfully completed the sale of its 200 MW / 400 MWh Battery Energy Storage System (BESS) project to EDF Renewables Polska, belonging to EDF Group, one of the world's ...

There are 147 energy storage projects under construction in Europe, with a total capacity of 14 GW, according to the European Energy Storage Inventory, launched by the European ...

The European Union is pushing ahead with plans to stockpile critical materials, with Italy, France and Germany set to take leading roles as the bloc moves to cut reliance on China, four ...

The European Energy Storage Inventory, developed by the Joint Research Centre (JRC) of the European Commission, is a new interactive platform that maps and analyzes over 1771 energy ...

Overview of energy storage technologies, including chemical, electrochemical, mechanical, and thermal storage solutions, supporting grid stability and renewable integration. This page presents links and ...

It offers a comprehensive view of the continent's storage infrastructure--from pumped hydro and battery systems to emerging technologies like hydrogen and thermal storage.

Discover the largest planned and under-construction battery energy storage projects in Europe as of mid-late 2025. The European Energy Storage Inventory comprises operational, under construction, ...

More climate-friendly production of foods, clean fuels and chemicals in Europe is receiving a boost from the EU-Catalyst partnership, a joint initiative by the European Investment ...

In a process that almost reverses oil extraction, chemical giant INEOS plans to inject liquefied CO₂ deep down into depleted oil reservoirs, 1,800 meters (5,900 feet) beneath the seabed.

The goal is to list all planned and operational energy storage projects in Europe by location and technology. The dashboard can be filtered by country, project status and technology.
