

Wind power generation work report

Why should you read the global wind report 2025?

We hope you will enjoy reading this year's Global Wind Report 2025 as much as the GWEC team has enjoyed writing it. This year's report finds the industry delivered another record year of new capacity in 2024, but also sees an industry ready to deliver so much more.

How has the world's wind power sector changed in 2025?

The world's wind power sector recorded strong growth in the first half of 2025, with global installations rising by 64% compared to the same period of 2024. A total of 72,2 gigawatts (GW) of new capacity were added between January and June 2025, following 44,1 GW installed in the first half of the previous year.

What is the global offshore wind report 2025?

Global Offshore Wind Report 2025 - Methodology and Terminology Data definitions and adjustments GWEC reports installed and fully commissioned capacity additions and total installations. New installations are gross figures not deducting decommissioned capacity.

How is electricity generation from wind measured?

Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources. Data source: Ember (2026); Energy Institute - Statistical Review of World Energy (2025) - Learn more about this data Measured in terawatt-hours.

WWEA Annual Report 2024: A Challenging Year for Windpower o Total capacity exceeds 1174 Gigawatt, o 121 Gigawatt added in 2024, slightly less than the last year o Dramatic 18% decline outside ...

Wind power, by its nature, offers a new paradigm for energy security and a nation's resilience, while also emerging as a key energy source for the world's fastest growing industries.

The Data and the Story - Wind in 2024 2024 marked yet another record year for wind energy with 117 GW of new installations worldwide. Looking beyond the marginal increase from last year, this report tells ...

IMARC Group's report on wind energy plant project provides detailed insights into business plan, setup, cost, layout, and requirements.

The first half of 2025 demonstrates the continued momentum and resilience of the global wind power sector. Driven by strong growth in China and steady expansion across major markets, wind ...

Fig. 2. Share of electricity generation from wind energy sources worldwide from 2010 to 2022[7]. Since the beginning of the third millennium, the total cumulative installed electricity generation capacity from ...

GWEC release the latest data on global markets for wind, country profiles, market analysis, and more.

In Fiscal Year 2023 (FY 2023), NREL received national acclaim for recent wind technology breakthroughs,

Wind power generation work report

applauded sustained decades of progress in wind energy research, and heralded new ...

Annual electricity generation from wind is measured in terawatt-hours (TWh) per year. This includes both onshore and offshore wind sources.

Out Now Download the report here GWEC's Global Wind Report 2025 This year's definitive guide to the wind industry is out now. Our Market Intelligence team brings you data that you ...
