

Within days of a nascent Opec-style agreement by Chinese solar photovoltaic (PV) manufacturers to end a bruising price war and curb oversupply, the pact was on the brink of unravelling.

"Capacity is set to more than double." Researchers make massive breakthrough that could revolutionize solar panels: "Accelerating" first appeared on The Cool Down.

China's largest solar panel manufacturers cut nearly one-third of their workforce in 2024, shedding about 87,000 jobs, as the sector struggles with falling prices, overcapacity, and mounting...

Reports yesterday claimed that the US tech billionaire's team had recently made secret visits to photovoltaic suppliers in China, looking at equipment, silicon wafers, and panel production, ...

China's efforts to rein in photovoltaic (PV) oversupply are unlikely to meaningfully reduce existing overcapacity and global solar panel prices are expected to stay low through much of 2025, ...

Officials from the United States have raised the alarm over what they have found in some Chinese solar panels linked to the electric grid. China is the world's leading manufacturer of solar...

In a new weekly update for pv magazine, OPIS, a Dow Jones company, provides a quick look at the main price trends in the global PV industry.

Recently, Hubei Province issued new rules for distributed PV, requiring general industrial and commercial systems to self-consume at least 50% of annual generation and encouraging PV ...

KUALA LUMPUR - Several Chinese-owned solar panel makers have shut down or scaled back their operations in Malaysia, industry sources say, as US tariff hikes in 2024 squeezed margins ...

Shares of Chinese solar panel makers surged after a team of staff sent by Elon Musk had reportedly visited several photovoltaic suppliers in China.
